COVID 19 break out Policy

Due to the spread of the Novel Coronavirus, referred to as COVID 19, the President declared a National State of Disaster.

The nation-wide lockdown has been divided into 5 threat levels and MRE have decided to treat them all as the most serious level 5.

MRE takes the health and wellbeing of their employees, their families, our clients, and their employees very seriously.

MRE has put strict policies in place to do their best to safeguard both the health and the wellbeing of all.

As an essential service provider, MRE have been working throughout the lock down recognizing the requirements of continual best service during a time that may only be described as the new short-term norm.

Throughout the country, all our branches have implemented sound policies and procedures to mitigate the spread of the novel corona virus.

Embedded into our policy structure is the cemented mind-set change of all employees towards the awareness of the novel corona virus. To ensure our clients, have one less thing to be concerned about, our technicians and installation teams are ready to assist any client with the correct PPE and awareness when we enter any site.

The policy structure below is available to any client for health and safety record purposes.

MRE also recognise that there is always room for improvement and pledge to work with their clients' safety reps to evolve during these difficult times.

Dennis Van Der Westhuizen

Group CEO
